Guidelines for Tomatoes

Preplant Soil Application: 24 ounces per acre *Soil Solution (Ntrilease RC)*: This application should be made in the Fall, and incorporated, or up to planting in the Spring. For No-till or over a growing crop, increase rate to 32 ounces per acre. *Designed to enhance digestion of crop residue and increase microbial activity.*

Transplant Water: Apply *Perceplus (Plant Power)* @ 8 ounces per acre in with total water volume.
Designed to reduce Lag Phase in root establishment after transplant.

Planting: Apply *Perceplus (Plant Power)* @ 16 ounces, *Calcium Plus* @ 32 ounces, *Sulfur Plus* @ 16 ounces, and *Boron Plus* @ 8 ounces per acre in a minimum 10 gallon total volume, either incorporated into the bed or knifed into side of seed bed.

This is a Starter Program designed to enhance initial crop establishment and hasten final crop maturity.

Seedling Foliar: After initial shock of transplant (4 to 5 days); Foliar Apply *Perceplus (Plant Power)* @ 16 Oz/acre. Apply twice on seven day intervals. **Note:** This application may be applied on a band at half rate.

This application is designed to enhance root development and build tolerance to early season stress.

****For High Nitrates:** Apply *Calcium Plus* @ 16 ounces with *Boron Plus* @ 4 ounces. Make this application as needed based on tissue tests or observation.

This combination is designed for managing nitrogen when it becomes excessive in the reproductive stages of crop development.

****Environmental Stress:** Apply *Perceplus (Plant Power)* @ 8 ounces in with pesticide applications.

Designed to maintain energy of crop and aid in leveling out extreme changes in crop metabolism from vegetative to reproductive, back to vegetative, and so forth.

2nd Cluster Bulking through Final Bulking: Apply *Nutri-K* @ 32 ounces, *Calcium Plus* @ 16 ounces, *Magnesium Plus* @ 8 ounces, and *Boron Plus* @ 4 ounces per acre on 7 to 10 day intervals for Four to Five applications.

Mixing: Always dilute *Nutri K* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

Designed to improve sizing, bulking, crop quality, and yield.

These **DeltAg Guidelines** have been utilized to enhance overall crop performance and are not intended to be utilized as a replacement for basic and customary fertilizer applications.
