

Copper Plus™

Low Rates - High Response

Soil/Foliar Micro-Nutrient

GUARANTEED ANALYSIS
0-0-0

Soluble Copper (Cu) 5.00%

Derived from Copper Sulfate
Weight per gallon: 9.51 lb at 68° F
Grams per liter: 1141 g at 20° C

GENERAL INFORMATION:

Copper Plus is designed as a source of copper to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

CONTAINS NON-PLANT FOOD INGREDIENTS: Amino Acids, Enzymes, Vitamins and **DeltAg** Proprietary Complexing Agent.

Copper Plus may be

- Foliar applied alone or with pesticides
- Used in drip irrigation systems
- Applied to soil via conventional methods

NOTE: **Copper Plus** is a registered fertilizer and is not intended for use as a fungicide or algicide.

APPLICATION RATE:

Soil: 24 to 32 ounces per acre

Foliar: 1 Pint per acre.

Apply in a minimum 5 gallon volume for ample coverage. * As much as 32 ounces per acre can be applied where deficiencies are observed.

Drip Irrigation: Apply one-tenth (0.10) ounce per 1,000 sq ft of foliage weekly as needed.

Injection at 1 to 100: Add 1 ounce per gallon of mix tank water (78 ppm of product) weekly as needed.

COMPATIBILITY:

This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility.

NOTE: Always follow label directions and precautionary statements on pesticide label.

*For More Information Please Contact **DeltAg**.

Copper Plus™

Function of Copper

Copper plays an integral part of light reactions in all plants and is a component of many plant enzymes. Copper has a direct impact on a plant's ability to convert carbohydrates to sugars, thus impacting final color and quality.

Enhance Sugar Production & Color

Copper Plus Applications

Copper Plus is often utilized in conjunction with disease programs to enhance crop tolerance to diseases that are already present in field and vegetable crops.

Copper Plus is applied late season to enhance final color in many crops such as melons, citrus, sweet potatoes and even in some commercial greenhouse applications.

NOTE: **Copper Plus** is a registered nutrient for crop production and is not formulated to be used as an algicide or as a fungicide.

Copper Plus™

Enhance Sugar Production & Color

www.seedcoat.com

Copper Plus™

**Chemistry....
Not Fertilizer!**

Helps Sugar Production

Copper Plus utilizes *DeltAg's* proprietary complexing agent *Fulvore*, which performs much like fulvic acid. It enhances a plant's ability to absorb nutrients and improves translocation of materials throughout the plant. The "*Plus*" indicates the presence of *Fulvore*, in conjunction with specific vitamins, enzymes and amino acids. *Copper Plus* has the ability to perform adequately at very low application rates as compared to other copper sources.

More About Copper Plus

Copper Plus is used as a soil or foliar copper source where copper deficiencies occur or where additional copper is desired. Always conduct a compatibility test before any large scale mixing.

**"It's Not What
You Put Out,
But What Gets
in the Plant....**

That Counts!"

Comparison of *Copper Plus* to other sources of copper has proven the superior uptake of copper into the plant through both foliar and soil applications. A typical use rate for soil application is to apply 24 to 32 ounces in side-dress liquid fertilizers. Foliar applications at 16 to 32 ounces have proven to be very effective.

Benefits:

Low Rate Crop Response *Copper Plus* is typically applied at rates of one-tenth ounce per 1,000 square feet for drip irrigation treatments and may also be injected at ultra low rates for commercial operations such as greenhouse or vegetable production.

Enhance Color *Copper Plus* has been utilized on many acres of crops such as melons, citrus and even sweet potatoes to enhance final fruit inner and outer color with applications being made in the weeks before final maturity

Disease Tolerance *Copper Plus* has been found to aid tolerance to disease where treatments are being made after heavy disease is already present in crops such as cereal grains and vegetables. *Copper Plus* has been tank mixed with many different fungicides and other pesticides. Always check for compatibility.

Copper Plus Versatility

- In-furrow with Seed
- Seedling Foliar
- Side-Dressed
- Injection
- Drip
- Fertigation
- Impregnation
