

Sulfur Plus™

Low Rates - High Response

Sulfur Plus™

Soil/Foliar Nutrient

GUARANTEED ANALYSIS

8-0-0-10 Low Analysis Fertilizer

Total Nitrogen (N) 8.00%
8.0% Ammoniacal Nitrogen
Sulfur (S) 10.00%

Derived from Sulfate of Ammonia
Weight per gallon: 10.34 lb at 68° F
Grams per liter: 1241 g at 20° C

GENERAL INFORMATION:

Sulfur Plus is designed as a source of sulfur to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

CONTAINS NON-PLANT FOOD INGREDIENTS: Amino Acids, Enzymes, Vitamins and DeltAg Proprietary Complexing Agent.

Sulfur Plus may be

- Foliar applied alone or with pesticides
- Used in drip irrigation systems
- Applied to soil via conventional methods

APPLICATION RATE:

Soil: Broadcast Incorporated: 64 ounces per acre.

Soil Surface Broadcast: 1 gallon per acre.

In-Furrow: Not Recommended.

Side-dress: 32 to 64 ounces per acre.

Foliar: Apply 32 ounces per acre in multiple applications as needed with enough water volume for ample coverage.

Drip Irrigation: Apply at a rate of one-half (0.50) ounce per 1,000 square feet of foliage weekly as needed.

Injection at 1 to 100: Add 4 ounces per gallon of mix tank water (312 ppm of product) weekly as needed.

COMPATIBILITY: This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility.

NOTE: Sulfur Plus has been found to be very effective as an AMS at 2 gallons per 100 gallons of total volume. Always follow label directions and precautionary statements on pesticide label.

Sulfur Plus™

Sulfur and Your Crop

Sulfur is a key factor in a plants ability to produce protein, required for healthy growth and development. Sulfur is involved in amino acid production and is a coenzyme in the synthesis of vitamins, which are required to maintain energy and better metabolism.

Darker - Greener Crops
Better Response to Applied Nitrogen
Healthier Seed Production

Sulfur Plus Versatility

Soil Application: 32 ounces per acre applied with liquid nitrogen. This application is designed to aid crop response to residual sulfur from soil organic matter.

Foliar Application: 32 ounces per acre on seedling crops where sulfur deficiencies are observed or anticipated.

AMS Source for Glyphosate: Many dealers have used *Sulfur Plus* as an AMS source and are very pleased at 8 to 16 ounces per acre in with herbicides.

Sulfur Plus™

**Chemistry...
Not Fertilizer!**

Superior Foliar and Soil Uptake

Sulfur Plus is a fast acting nutrient source. *Sulfur Plus* utilizes *DeltAg's* proprietary complexing agent *Fulvore*, which performs much like fulvic acid. It enhances a plant's ability to absorb nutrients and improves translocation of materials throughout the plant. The "*Plus*" indicates the presence of *Fulvore* in conjunction with specific vitamins, enzymes and amino acids. *Sulfur Plus* has the ability to perform adequately at very low application rates as compared to other sulfur sources. *Sulfur Plus* means lower cost and better results.

Comparison

Comparison of *Sulfur Plus* to other sources of sulfur has proven the superior uptake of *Sulfur Plus* into the plant through both foliar and soil applications. A typical use rate for soil application is one quart per acre in with other side-dress fertilizers. When sulfur response is a concern in the crop, using *Sulfur Plus* foliar applications at one quart per acre have proven to be very effective.

*Sulfur Plus
is a Fast Acting
Nutrient Source*

"We Sell Crop Response"

What is Sulfur Plus?

Sulfur Plus contains sulfate sulfur from ammonium sulfate that has been formulated utilizing *DeltAg's Fulvore* and "active" chemistry. This special formula delivers sulfur to the plant in a more natural form for faster absorption and better translocation.

*Low Rate
Crop Response*

How to Use Sulfur Plus?

Soil:

Growers have found *Sulfur Plus* to be more economical than other liquid sulfur sources when applied at 32 to 64 ounces per acre, tank mixed with liquid nitrogen in side-dress applications.

Foliar:

Apply *Sulfur Plus* at 16 to 32 ounces per acre overhead as a foliar spray. *Sulfur Plus* may be tank-mixed with most pesticides, however it is always advisable to check for compatibility.

AMS:

Sulfur Plus has been found to be very effective at 16 ounces per acre as a sulfur nutrient source and as an AMS. Get a nutrient sulfur source and AMS from one great source, *Sulfur Plus*.

Other Uses:

Sulfur Plus has been used successfully in impregnation, fertigation, drip irrigation, and nursery applications.
