

# Activator Thrust™

Low Rates - High Response

## Nutrient Activator

GUARANTEED ANALYSIS  
0-0-0

Soluble Zinc (Zn) ..... 2.00%  
Derived from Zinc Sulfate  
Weight per gallon: 8.86 lb at 68°F  
Grams per liter: 1062 g at 20° C

### GENERAL INFORMATION:

**Thrust** is a liquid additive which is designed to improve crop response to liquid blended nutrients and enhance pesticide applications. **Thrust** contains a high concentration of **DeltAg's** proprietary **Fulvone** for improved plant uptake.

**NOTE:** By design, this product could enhance the activity of contact herbicides.

### COMPATIBILITY:

This product is compatible with most commonly used fertilizer blends and pesticides. However, it is advisable to always check for compatibility.

### APPLICATION RATE:

**Foliar Broadcast:** Add 8 ounces per acre to your fertilizer or pesticide applications.

**Liquid Nutrient Activator:** As an aid in liquid nutrient formulations, **Thrust** may be added to the solution at a rate of 1/2 % by volume. Specific liquid nutrients may require different rates depending on final rate per acre and solution pH. For best results consult with your **DeltAg** representative.

**NOTE:** Always follow label directions and precautionary statements on pesticide label. **Thrust** has been used effectively with many overhead herbicides on row crops such as cotton, corn, soybeans, and small grains such as rice and wheat.

**CAUTION:** KEEP CONTAINER TIGHTLY CLOSED AND OUT OF REACH OF CHILDREN.

\*For More Information Please Contact **DeltAg**.

# Activator Thrust™

## Nutrient Blends

Take your nutrient blends to the next level for your growers with the addition of **Thrust**. Compatible with most formulations. \*Always check for compatibility before any large scale mixing.

## Get a Market Edge On Nutrient Blends

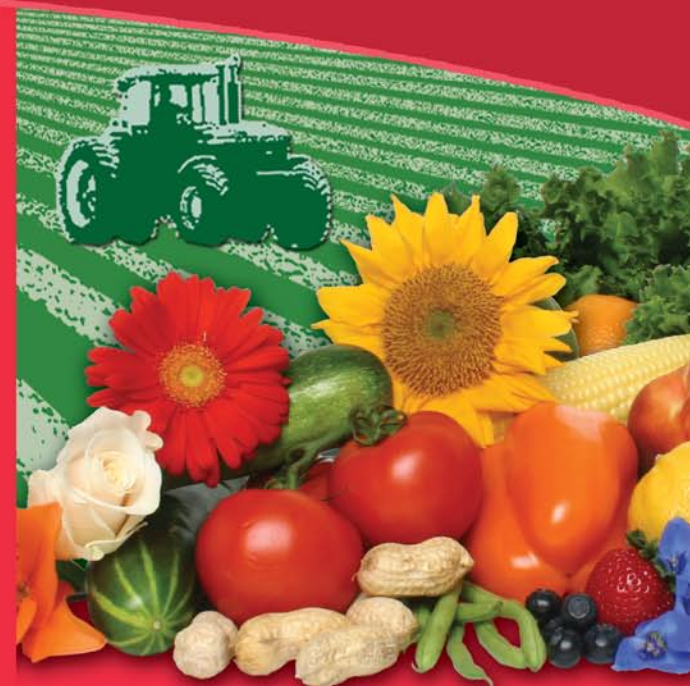

## Pesticides

While originally designed and proven to be a great safener, **Thrust** is now used to enhance pesticide performance while it safens your crop.

**Chemistry...  
Not Fertilizer!**

## Increase Nutrient Performance

Many dealers that formulate liquid starters and foliar, or that sell high volume rates of side-dress liquids, or custom blends, have found the addition of **Thrust** gives them improved "Crop Response".

*Enhance Your Custom Blends*

Get your products to the next level of "Crop Response" with **Thrust**. While easy to add and very compatible with most liquids, **Thrust** can also be impregnated on dry granular fertilizer with ease.

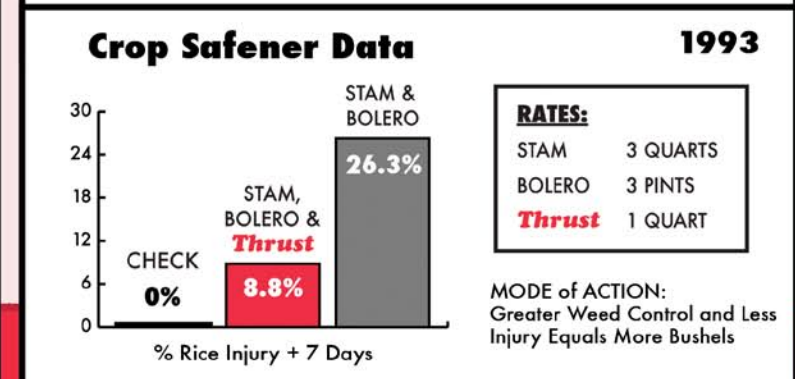

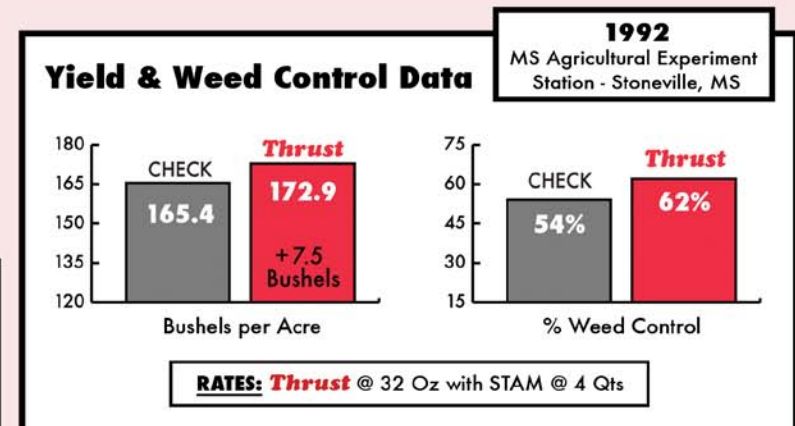

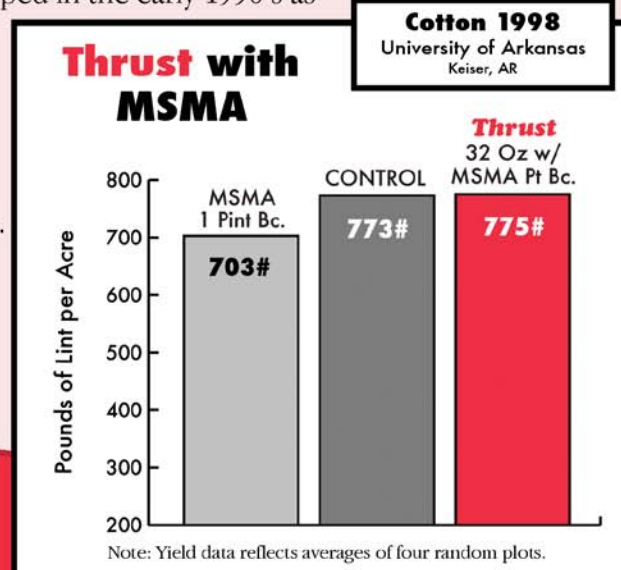

## What is Thrust?

This **DeltAg** formula was originally developed in the early 1990's as an additive to be used to help safen the effect of harsh herbicides on crops. **Thrust** contains zinc and very high concentrations of **DeltAg's** proprietary complexor "**Fulvore**", which improves membrane permeability and translocation. It did not take long to recognize another great benefit to **Thrust** - improved herbicide performance.

## Safen and Activate

**Thrust** has been shown to safen and protect crops while, in many cases, adding some kick to the tank-mixed pesticides. **Thrust** provides improved pesticide performance with better uptake and translocation throughout the plant and roots of crops and weeds, creating a more selective effect.

*Low Rate Crop Response*

All data shown are results compiled for **Thrust** research and are not guaranteed. Results may vary according to weather conditions.
