Guidelines for Soybeans

Preplant Soil Application: Apply *Soil Solution* @ 24 Oz/acre. This application should be made in the Fall and incorporated or up to planting in the Spring. For No-till or over a growing crop, increase rate to 32 Oz/acre.

Designed to enhance digestion of crop residue and increase microbial activity.

Seed Treatment:

DRY Hopper Box Seed Treatment: Apply *Seed Coat* @ 2 to 3 Oz (dry weight) per acre. The standard recommended rate for *Seed Coat* is 4 Oz per 50 pounds of seed.

Designed to stimulate micro-flora in the rhizosphere immediately adjacent to seed, and enhance seedling root development and stand establishment.

Soil Applied: For lower than desired pH: Apply *Calcium Plus* @ 32 Oz/acre, close to the root zone. Temporary, **WILL NOT** correct soil pH or Replace the need for Lime.

Designed to temporarily acidify soil profile around germination zone.

Seedling Foliar: One application of *Percplus* @ 24 to 32 Oz/acre broadcast, applied at 4 leaf to second tri-foliolate. **May be split into two applications of 16 Oz/acre each, on 14 to 21 day intervals and may be applied with each of two glyphosate or herbicide applications.

****Micronutrients:** Apply *MicroVite* @ 32 Oz/acre tank-mixed with the *Percplus*.

Designed to enhance crop vigor, root development, and tolerance to stress.

History of Lodging: Apply *Boron Plus* @ 6 Oz/acre as a foliar at 3rd to 4th tri-foliolate. May be applied with second glyphosate or herbicide application.

Designed to drive Nitrate Nitrogen levels down to induce nodulation and reduce lodging.

Initial Pod Set: *CropKarb* @ 32 Oz/acre. May be applied with fungicide or insecticide. Timing at R-3 and again at R-4. (Two applications)

Designed to enhance pod set, sizing and maturity.

NOTE: *CropKarb* may be replaced with a tank-mix of *Nutri K* @ 32 Oz, *Percplus* @ 8 to 16 Oz, and *Boron Plus* @ 4 Oz. *Plant Power* may be substituted for *Percplus* and vice-versa in any application and at the same rate.

Mixing: Always dilute *Nutri K* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

These **DeltAg Guidelines** have been utilized to enhance overall crop performance and are not intended to be utilized as a replacement for basic and customary fertilizer applications. **“Other Crop Specific Guidelines are available upon request.”**
