Nutrient Functions

Sulfur & Your Crop

**Darker...Greener Crops
Better Response To Applied Nitrogen
Healthier Seed Production**

Sulfur is a key factor in a plants ability to produce protein, required for healthy growth and development. Sulfur is involved in Amino Acid Production & is a Co-enzyme in the synthesis of vitamins, which are required to maintain energy and better metabolism.

Sulfur Plus Versatility

Soil Application: 32 oz/acre applied with Liquid N. This will prove to be a quality source for Sulfur for a given crop year, particularly on low organic, sandy soils.

Foliar Application: 16 oz/acre 'Banded' on seedling crops where Sulfur deficiencies are observed or anticipated.

AMS Source for Glyphosate: Many dealers have used Sulfur Plus as an AMS source and are very pleased at 8 to 16 ounces/acre in with herbicides.

"Its not what you put out, but what gets in the plant
....that counts!"

Sulfur Plus

Soil / Foliar Nutrient

Low Rates-High Response

Builds More Protein

FAST ACTING

GUARANTEED ANALYSIS
8-0-0-10
Low Analysis Fertilizer
Total Nitrogen (N) 8.00%
8.0% Ammoniacal Nitrogen
Sulfur (S) 10.00%

Derived from Sulfate of Ammonia
Weight per gallon: 10.34 lbs. at 68° F
Grams per liter: 1229 gm at 20° C

GENERAL INFORMATION
Sulfur Plus is designed as a source of sulfur to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops. This product contains organic complexors for improved foliar effectiveness.

Sulfur Plus may be:
•Foliar applied alone or with pesticides
•Used in drip irrigation systems
•Applied to soil via conventional methods

SHAKE WELL BEFORE USING

APPLICATION RATE
Soil Broadcast: Incorporated, 64 ounces per acre.
Soil Surface Broadcast: One gallon per acre.
In-Furrow: Not Recommended.
Side-Dress: 32 to 64 ounces per acre.
Foliar: Apply 32 Oz per acre in multiple applications as needed with enough water volume for ample coverage.
Drip Irrigation: Apply at a rate of one-half (0.50) Oz per 1,000 square feet of foliage weekly as needed.

COMPATIBILITY: This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility.

NOTE: Sulfur Plus has been found to be very effective as an AMS at 2 gallons per 100 gallons of total volume. Always follow label directions and precautionary statements on pesticide label.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Follow all governmental procedures for the disposal of pesticide spray solutions. Triple rinse container; empty residue into spray tank. Dispose of empty container according to approved local practices.

CONDITIONS OF SALE
Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risk of use, storage or handling of this material when not in strict accordance with directions.

CAUTION: KEEP CONTAINER TIGHTLY CLOSED AND OUT OF REACH OF CHILDREN.

Sulfur Plus

Superior

Foliar and Soil Uptake

Sulfur Plus is a fast acting Nutrient Source. **Sulfur Plus** utilizes a proprietary complexing agent "**Fulvore**", which contains a high concentration of Fulvic acid. This complexor, when present in a slightly acid pH, will enhance a plant's ability to take in nutrients, and aids in improved translocation of these materials throughout the plant. The "**PLUS**" indicates the presence of "**Fulvore**" as well as natural plant extracts.

Sulfur Plus has the ability to perform adequately at very low application rates as compared to other Sulfur sources. **Sulfur Plus** means lower cost and better results.

Comparison

Comparison of **Sulfur Plus** to other sources of sulfur has proven the SUPERIOR uptake of **Sulfur Plus** into the plant through both FOLIAR and SOIL applications.

A typical use rate for soil application is one quart per acre in with other side-dress fertilizers. When Sulfur response is a concern in the crop to be grown, use **Sulfur Plus**.

Foliar applications at one quart per acre have proven to be very effective.

"We Sell Crop Response"

What is Sulfur Plus

Sulfur Plus contains Sulfate Sulfur from ammonium sulfate that has been formulated utilizing organic complexing agents and natural plant extracts. This special formula delivers Sulfur to the plant in a more natural form for faster absorption and better translocation.

Fast Acting
Nutrient Source

How To Use Sulfur Plus

Soil

Growers have found **Sulfur Plus** to be more economical than other liquid Sulfur sources when applied at 32 to 64 ounces per acre, tank mixed with Liquid Nitrogen in side-dress applications.

Foliar

Apply **Sulfur Plus** at 16 to 32 ounces per acre overhead as a foliar spray. **Sulfur Plus** may be tank-mixed with most pesticides, however it is always advisable to check for compatibility.

AMS

Sulfur Plus has been found to be very effective at 16 ounces per acre as a Sulfur nutrient source and as an AMS. Get a nutrient Sulfur source and AMS from one great source, **Sulfur Plus**.

Other Uses

Sulfur Plus has been used successfully in impregnation, fertigation, drip irrigation, and nursery applications.
