DeltAg Product Brief

Cold, Wet Spring and *PercPlus*

PercPlus: Many dealers across the country have discovered the many methods of utilizing ***PercPlus*** and its great benefits.

PercPlus* Seed Treatment:** ***PercPlus has been applied by many seed dealers along with conventional seed treatments at a rate of 10 ounces per 100 pounds of seed. In the past weeks of cold weather, dealers have reported benefits such as; *better emergence, more vigor, better survival rates, a stronger and better developed root system, and most importantly a shortened 'lag' phase as the young plant waits for the root system to establish itself.*

***PercPlus* In-Furrow:** Applied directly on the seed at planting at a rate of 8 ounces per acre. **Benefits:** *Better germination, more root mass, healthier roots, better survival, more vigor.*

PercPlus* Seedling Foliar:** Apply 8 to 16 ounces banded on the first true leaf of the crop and follow with a second application in 7 to 10 days. Many producers are making this application in with ***glyphosate treatments to save a trip and are very pleased with crop response and weed kill. **Benefits:** *Enhanced vigor and crop development, while reducing stress associated with seedling disease, chemical damage and Mother Nature.*

Zinc Plus: This versatile micronutrient has been proven to be very effective at ultra low rates as it compares to conventional Zinc sources.

Zinc Plus* Side-Dressed:** Growers through-out the Corn Belt are discovering the great benefits of ***Zinc Plus when added to their Side-Dress Nitrogen application. ***Zinc Plus*** has been found to be a great supplemental Zinc source for corn and other high Zinc demand crops at a 32 ounce per acre rate.

Reminder: ***Zinc Plus*** is a 10% Zinc and 4.5% Sulfate Sulfur and is an excellent source for Sulfur.

Sulfur Plus: This ***DeltAg*** product has been used as a great Sulfur source when applied at 32 ounces per acre with side-dressed nitrogen to many crops in the Mid-South and Mid-West. ***Sulfur Plus*** is also an excellent foliar Sulfur at 16 to 32 ounces per acre. Some dealers are using it with ***glyphosate*** to supplement **AMS** requirements with great success.

DeltAg* Product Brief:** ***DeltAg dealers receive this series of Product Briefs. If other members of your staff would like to receive a Brief, we will gladly add them to our list of recipients.
